

Applying to CIHR's Open Operating Grant Program (OOGP) at Western University

2013 OOGP FALL COMPETITION: SEPTEMBER 2013

Office of Research Services — Western University

The objectives of the Open Operating Grant Program are to:

- provide operating funds to support research proposals in all areas of health research including randomized controlled trials. The OOGP is the largest program at CIHR.

The OOGP is flexible, in that there is:

- ✓ No specific requirements in relation to team size or team composition; nonetheless, the role of each applicant must be clearly identified;
- ✓ No specific requirements or restrictions on the specific research activities to be undertaken;
- ✓ No minimum dollar value, however due to budget restrictions with the large grant envelope (see below), **no individual grant application exceeding a total cost of \$12.5M will be accepted.**

Application Submission Guide

Mandatory Registration: August 15th | 8 pm EST

Registration is done directly on ResearchNet. Once registered, the *title of the grant, peer review committees chosen, and Nominated Principal Applicant* cannot be changed without CIHR's approval.

Department/Faculty Internal Review/Deadline: Varies

Some departments and faculties have their own internal deadlines prior to grant submissions to RDS. Consult your department and faculty administrative offices for more information on deadlines and/or requirements.

Mandatory RDS Internal Review: September 9th | 8 pm EST

Applicant clicks "**Submit to Research Office**" on ResearchNet. RDS will then review to ensure the grant is compliant with both CIHR and Western's relevant policies. Draft applications can be returned by contacting researchoffice@uwo.ca.

A ROLA entry must be submitted by the internal deadline. The CIHR OOGP can be found on the ROLA funding opportunities main page. Should you require assistance with the system, please contact the ROLA helpline (519-661-3136 or rolahelp@uwo.ca)

Full Application Deadline: September 16th | 2 pm EST

Having finished the requirements outlined above by their stated deadline, the applicant clicks "**Submit to Research Office**" on ResearchNet. **Research Services will then forward the application to CIHR.**

Key Dates

Mandatory Registration:
August 15, 2013
8 pm EST

Mandatory RDS Review/ROLA:
September 9, 2013
8 pm EST

Full Application Deadline:
September 16, 2013
2 pm EST

Please Note:

Applications in the OOGP are not sent directly to CIHR. Full applications submitted on ResearchNet are first sent to RDS for review and approval prior to submission to CIHR.

RDS will not forward an application on to CIHR without a ROLA entry first having been submitted and approved.

Please Plan Ahead Accordingly!

Frequently Asked Questions

Q Can a trainee who is also a co-applicant receive a stipend or salary from the grant?

A Yes, PhDs and Post-Doctoral Fellows may receive stipend/salary from a grant even while listed as a co-applicant.

Q How much should I ask for on my application?

A In the March 2013 competition the overall average amount requested per year by successful applicants was \$xxxx (nationally). Please ensure you create your budget based on the actual costs required by the research, as this will be evaluated by the committee.

Q Should I include indirect costs in my budget?

A No, CIHR will not fund any indirect cost expenses (this includes many office supplies, such as pens, folders, writing pads, etc.).

Q Can an OOGP grant be used to fund equipment?

A Do not include equipment (anything that has a useable life of over 1 year and costs over \$2,000) in your budget. Click here for more information. Once awarded, however, you may re-budget funds to purchase equipment as needed.

Q Can I add information to my application once it has been submitted to CIHR?

A No, CIHR will not accept modifications once the application has been submitted. The only exception to this are 'notices of final acceptance of publications,' which will be accepted until **October 28th, 2013**. Send these in *.pdf form* to the coordinator of your 'first choice' committee.

Q What signatures do I need? Do I need a signature from the "Authorized Signing Official from the Institution Paid" on the routing slip before submission?

A **No**, as this program uses the electronic approval system you do not need an institutional signature. Institutional approval is provided after final submission. The only signatures you require on the grant are those from co-primary applicants, co-applicants, and knowledge users. **Signatures are not needed from those listed as 'collaborators.'**

Q What is Western's Tax Rebate Rate?

A The university is entitled to a rebate of 73.8% on HST. To determine the cost of your purchase including both tax and tax rebates, multiply the purchase price by **1.0341**.

Priority Announcements

Applying to priority announcements will increase your chance of receiving funding in CIHR competitions!

The priority announcements available for the September 2013 competition are:

- [Aboriginal Ways of Knowing](#)
- [Aging \(Bridge Funding\)](#)
- [Applying the "Two-eyed Seeing" model to Aboriginal Health](#)
- [Bariatric Care \(Bridge Funding\)](#)
- [Blood Supply Risk](#)
- [Blood Utilization and Conservation](#)
- [Breast Cancer Research \(AVON\)](#)
- [Breast Cancer \(Bridge Funding\)](#)
- [Cancer Research \(Bridge Funding\)](#)
- [Circulatory and Respiratory Health – New Investigators \(Bridge Funding\)](#)
- [Drug Safety and Effectiveness \(Bridge Funding\)](#)
- [Ethics](#)
- [First Nations, Inuit and/or Métis Health \(Bridge Funding\)](#)
- [Gender, Sex and Health Research - Integration and Innovation](#)
- [Genetics \(Bridge Funding\)](#)
- [HIV/AIDS](#)
- [Infection and Immunity \(Bridge Funding\)](#)
- [Inflammatory Bowel Disease \(Bridge Funding\)](#)
- [INMD Start-up Funds \(Bridge funding for Assistant - Professors, Clinicians, New Investigators\)](#)
- [Knowledge Translation](#)
- [Musculoskeletal Health, Arthritis, Skin and Oral Health](#)
- [Musculoskeletal Health, Arthritis, Skin and Oral Health – New Investigators](#)
- [Neurosciences, Mental Health and Addiction \(Bridge Funding\)](#)
- [Nutrition, Metabolism and Diabetes \(Bridge Funding\)](#)
- [Ovarian Cancer \(Bridge Funding\)](#)
- [Reproductive and Child Health \(Start-up Grants\)](#)
- [Transfusion Related Acute Lung Injury \(TRALI\)](#)

Attention: Robarts Researchers

When filling out your application on ResearchNet:

- The University of Western Ontario (CEEA) must be listed as the Institution paid.
- List the Schulich School of Medicine and Dentistry (264) as your Faculty.
- **List Robarts (17X) as your Department.**

Application Tips

- CIHR committees often expect applicants to **have preliminary data to show that their methods or aims are feasible**. Some can expect as much as 20% to 30% of the research done before submission!
- The national success rate is currently ~17%; it usually takes, on average, **two full submissions** before you achieve success.
- Engage your audience and write with the reviewer in mind. **Don't make your grant difficult to read by using too many acronyms, jargon, or employing odd formatting.**
- The **summary of progress and general summary** are extremely important during the review process. Take time to write these carefully.
- Address the [evaluation criteria](#) in the funding call and [peer review manual](#).
- **Don't wait until the last minute to begin working on the proposal.**
- Ensure your grant follows CIHR's [regulations on attachments and formatting](#). **If your application violates these guidelines, CIHR may withdrawal the proposal from the competition.**
- If your research is eligible for consideration in a [priority announcement](#) be sure to apply as this will increase your chances of receiving (some) funds.
- Pre-empt any concern over funding overlap by explaining how your current proposed research is **independent from that of your other grants** in the budget justification section.
- If you are resubmitting, provide a 2 page response to previous reviewers. **Don't assume the members of the committee will remember their comments from your previous submission**, so be sure to quote each comment you are responding to. If you received a high ranking in the last submission, remind the committee by quoting the score.
- In addition to having valid scientific aims and arguments, ensure that your grant does not suffer from some of the more mundane/common application issues (seen below).

Some Common Application Critiques	Frequency
The research/researcher is not health-based The summary is not satisfactory/does not provide a good overview There is an issue with the publications or references There is a potential issue with funding overlap from other grants	Low
There are issues with, or an absence of, letters from collaborators There is an absence of the discussion of expected results The team roles are not well defined There is a technical/display issue with the figures and/or tables There is an issue with the hypothesis or synthesis of aims The lay summary or lay title is too technical for the general public A budget item is not justified	Medium
The applicant has low productivity in the field of research The grant suffers from poor writing There is an issue with, or absence of, preliminary data for a method/aim	High

Budget Regulations

What remuneration rates are applicable to Western University?

Type	Salary Rate
Full-Time Staff	*Salary +27.5% mandatory employers contributions
Part-Time Staff	*Salary +13% mandatory employers contributions

* Please consult your department's administration for applicable/appropriate salary rates.

Type	Stipend Level
Graduate Students	Consult Department or Faculty (averages around ~\$20,000)
Post-Doctoral Fellow	Consult Department or Faculty (averages around ~\$40,000)

Please note, CIHR allows graduate students to be paid as Research Assistants (salary and benefits) or Research Trainees (stipend only). Consult with your department or faculty for the correct internal guidelines for each, and explain your choice in the budget justification module. Click [here for more information](#).

What is the difference between stipend and salary?

What is a student stipend?

A stipend is money, paid to a graduate student, for work done on their thesis research which is also part of the research project of the professor's grant. This source of money is treated as a scholarship for income tax purposes.

What is a student salary?

A salary is an hourly wage for work undertaken by a student on a professor's research, not necessarily related to the topic of the student's thesis. Salaries are taxable, and in contrast to stipend are provided as payment for services rendered.

Contract your Department or Faculty administrative office for more information on the appropriate form of pay for your division.

What is the OOGP "Large Funding Envelope?"

The "Large Funding Envelope" was an initiative created by CIHR in 2010. After committee evaluations have been finalized CIHR pulls all grants whose annual funding levels exceed a set limit (during the September 2012 cycle this was any proposal requesting over \$390,711 annually) into a separate funding scheme. These applications are re-sorted together according to the rank they received in their respective home committee. \$12.5M is then set aside specifically for these 'large grants' and funding decisions are made top-down according to the new sorting.

This process results in the possibility that there will be large grants ranked above the percent rank cutoff for funding within their home committee, but which fall below the percent rank funding cutoff for the large grants envelope - unfortunately these grants will not be funded by either envelope. By contrast, it is also possible that an application ranked below their respective home committee funding cutoff level will be successful within the large grant envelope due to the re-sorting.

For clarification on what is eligible for support on CIHR grants, see the "Use of Funds" section of the [Tri-Council Financial Administration Guide](#).
